

Earth Resources Fund

Fund Description

*Indicative allocation to each asset (Oil, Alternative Energy, Precious Metals, Agriculture):
20% to 30% of the value of the fund*

The Eagle Star Earth Resources Fund is a unit-linked fund that invests in and targets equal exposure to a range of diverse assets: oil, alternative energy, precious metals and agriculture. This fund has been designed to offer investors exposure to the world's physical resources. The increasing demand for physical resources, resulting from an expanding population and economic growth in emerging markets, underpins the potential for this fund to provide strong investment returns. To maintain a balanced portfolio the fund will be monitored and rebalanced if any asset moves significantly outside its guideline exposure. Exposure to each asset will be reset to 25% on rebalancing. A currency risk arises as the majority of the investments held are currently transacted in US\$.
